Subject:	Match authentication is no longer optional. Always required.		
Description:	<p>It just came to my attention that match authentication is no longer optional in the frontend, factory and submit services.</p> <p>It must always be True.</p> <p>Both the q/a and ini installer still provide for this as an option.</p> <p>Changes need to be made to:</p> <ol style="list-style-type: none">1. q/a installer2. ini installer3. the programs that use it (which may or may not require changing depending so long as we insure it is always True)		

History

09/26/2011 03:33 pm - Burt Holzman

- Assigned to set to John Weigand

assigned to John to fix the .ini installer (we'll hit the Q&A installer after that, and then the docs)

10/03/2011 09:49 am - John Weigand

- Target version set to v2_5_3

The scope of this has changed for v2.5.3.

The option will not be removed completely.

The match_authorization option is removed from the Factory, Submit and

VOFrontend ini files. If present, they will be ignored.

The USE_MATCH_AUTH attribute will still be created in the xml configuration

files of both the Factory and Frontend by default but will always be set to

True. This allows a user to remove this feature if they so choose.

- Due date set to 10/03/2011

- Category set to Installer

- Status changed from New to Resolved

v2plus commit: a71720d7b09eb214100d9fc67bd6210912d4b710

master commit: ebc364a29b31eac1586e92b2043cc22ae2038012

10/03/2011 11:18 am - John Weigand

Thought I would add the modules affected on the commit:

modified: doc/components/condor_config.html

modified: doc/components/configuration_install.html

modified: doc/components/pool_install.html

modified: doc/factory/configuration.html

modified: doc/factory/install.html
modified: doc/frontend/install.html
modified: install/glideinWMS.ini
modified: install/glideinWMS_install
modified: install/services/Condor.py
modified: install/services/Factory.py
modified: install/services/Glidein.py
modified: install/services/RPM.py
modified: install/services/Submit.py
modified: install/services/VOFrontend.py

10/03/2011 11:27 am - John Weigand

For v3.0, Redmine #1957 was issued to make match authentication
the standard/only mode of operation.
